

HANSA FOR THE KITCHEN

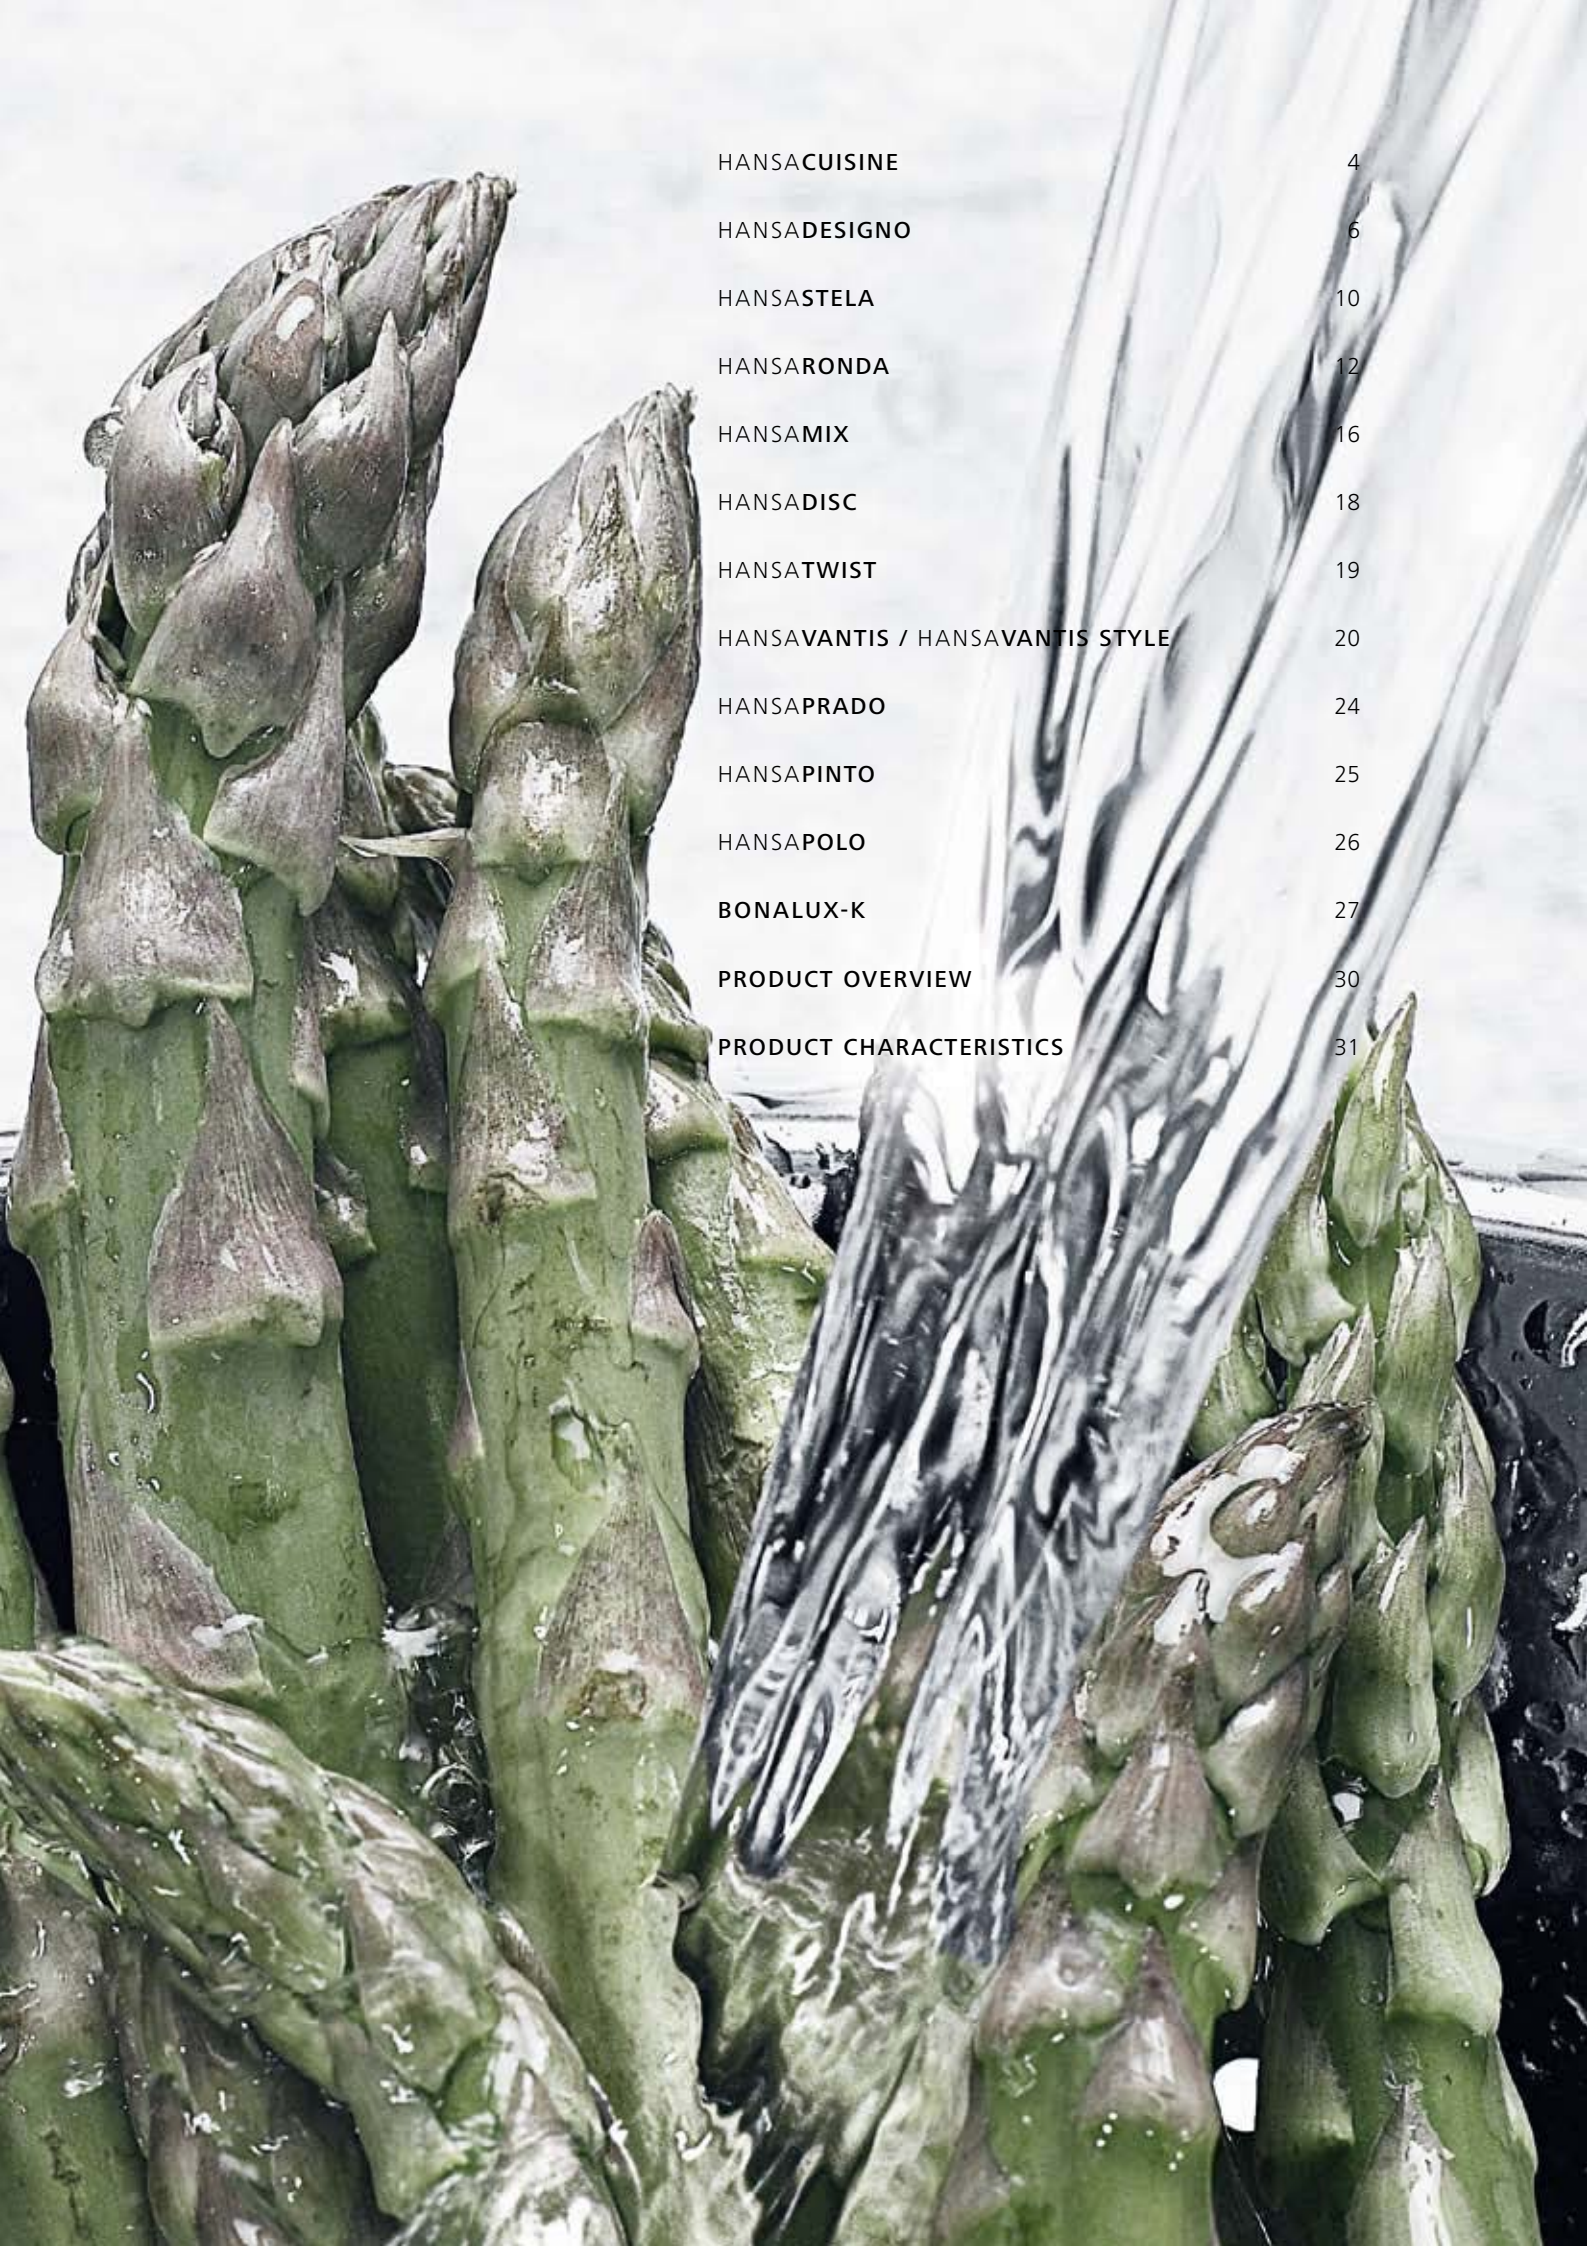

Water makes cooking an experience. Water makes cooking a pleasure. Wasser macht Kochen zum Erlebnis. Wasser macht Kochen zum Genuss. Avec l'eau, la cuisine devient découverte. Avec l'eau, la cuisine prend toute sa saveur. L'acqua trasforma il cucinare in un'esperienza unica. L'acqua trasforma il cucinare in un piacere. Water schenkt koken z'n beleving. Water schenkt koken z'n genot. Con el agua, cocinar se convierte en una experiencia. Con el agua, cocinar se convierte en un placer.

"Experience water" is the philosophy we stand for.

In the interaction of origin and future, constant reflection on the element water is HANSA'S priority. We endeavour to take the properties of water that people value and apply these to our products in the spirit of innovation. "Experience water" is therefore the essence of our brand – it is our pledge to you.

As a valuable resource, water is a natural part of the kitchen. A fitting from HANSA not only offers convenient use but also an experience: During preparation, cooking and washing. All will impress you with top-class workmanship and exquisite materials, high robustness and maximum ease of use, with exemplary economy and discreet elegance. Every day anew.

PRODUCT OVERVIEW	30
PRODUCT CHARACTERISTICS	31

It has many faces. And all of them are beautiful: HANSACUISINE.

To ensure that the HANSACUISINE can shine in your dream kitchen, it is available in many variations – for all requirements, but always stylish. With swivel spout, pull-out shower or adjustable water stream strength it will impress you virtually all along the line.

With every variation, the HANSACUISINE offers the flexibility you need so that you can conveniently fill even large pots. Spouts that can be detached at the socket create extra space, for example when installing it in front of a window.

For variations and explanation of the product characteristics refer to Page 30/31.

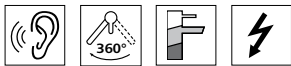

HANSACUISINE as variation with pull-out hand shower and adjustable water spray strength. Alternatively to the soft spray, the needle spray provides the pressure necessary for cleaning fruit or removing leftover residues.

It is the details that define the class and the style in the kitchen: as in the HANSADESIGNO.

HANSADESIGNO is a class on its own: A delicate body with an elegantly curved, high spout, with fine harmony in the shape transitions and precisely worked out details. Versatile thanks to glass inlays in different colours in the operating lever and easy to clean thanks to minimum gap dimensions or covered spray regulators. These features make HANSADESIGNO a style-defining model for the perfect combination of modernity, functionality and lasting value.

For variations and explanation of the product characteristics refer to Page 30 / 31.

Twice as practical:
The high and swivelling spout of the HANSADESIGNO makes work at the sink much easier. With the distinctive pin-type lever, temperature and water amount can be regulated accurately and smoothly.

You are an aesthete.

You are a person who knows how to enjoy the good things in life.

You are a passionate cook.

Let us celebrate with you.

Plain and simple: HANSASTELA.

The HANSASTELA is the logical combination of exquisite design and consistent pragmatism. The wide, strictly geometric spout not only defines the style of the fitting but also its functionality. To offer a greater latitude, the spout can be swivelled by 150°. Generously dimensioned with a height of 246 mm, it ensures that even high pots and vessels can be filled without problems. To ensure that any window arranged behind it can still be opened, the entire fitting can be removed from the mounting socket and can be re-installed. Its most distinctive highlight feature is the slim, modern joystick ensuring easy, smooth but still precise control of the HANSASTELA.

For variations and explanation of the product characteristics refer to Page 30/31.

The geometry of good style: The HANSASTELA masters it. Completely different, but always clear shapes like rectangles and circles are combined to an unpretentious, distinct language of shapes. There is no way to "hide" sophisticated functionality in a simpler and more beautiful manner.

In your kitchen, rely on comfort and top-class technology: with a HANSARONDA.

HANSARONDA is the good soul of every kitchen. With its soft, flowing lines and the well thought through technical details it reliably fulfils the requirements of every day use. As a standard version with extendable spout, with hand spray or with appliance shut-off valve HANSARONDA is very flexible and a practical assistant in your household that saves you a lot of work. You will find more detailed information in the product overview from page 30.

For variations and explanation of the product characteristics refer to Page 30/31.

Nice and practical: HANSARONDA as a variation for wall mounting. The 30 cm long swivel spout has a very large radius (120° lockable in central position) and is ideal for changing between two sinks.

Hurrah to flexibility: The HANSARONDA with pull-out spout is also available with hand spray that can be switched between soft and needle spray.

Adding. Filling up.

Heating up. Cooling.

Simmering. Cooking. Chilling.

Cleaning. Rinsing.

Refreshing.

Water is cooking.

Water is enjoying.

Classics are simply built well: HANSAMIX.

HANSAMIX is one of the best known and most successful Hansa kitchen fittings. With its unpretentious elegance and the constantly refined technology, it is considered the standard for functional kitchen fittings even after more than 25 years.

High-quality chrome, smooth control and versatile functional details make sure that the HANSAMIX becomes a classic in your kitchen as well.

For variations and explanation of the product characteristics refer to Page 30/31.

The long swivelling spout is optionally available with the practical pull-out spout. Combined with a flexible and robust metal hose, you can simply pull the hand shower to wherever you need water. HANSAMIX is also available with appliance shut-off valve.

Flexible all around: HANSAMIX as wall-mounted fitting above two sinks (swivel range: 120°).

Easy to clean, easy to control. Easy to like: HANSADISC.

The HANSADISC makes it easy for you to shine. Thanks to its robust surface finishes, it is easy to clean and fits – optically discreet – in many kitchens. Also technically, it will meet your requirements when working with heat: Its movable spout with a swivel radius of 360° effortlessly reaches every corner of the sink.

For variations and explanation of the product characteristics refer to Page 30/31.

The slim one that helps when things get tough in the kitchen: HANSATWIST.

HANSATWIST has established itself with its small and stable brass body and its slim, cast spout. The HANSAECO control cartridge and the smooth-running operating lever guarantee accurate temperature and water control. HANSATWIST stands for the best Hansa quality that a modern kitchen needs.

For variations and explanation of the product characteristics refer to Page 30/31.

If you wish to prepare warm water using an under-mount appliance, you will need a low pressure fitting. For this reason, the HANSATWIST and other single-lever mixers are also available as variation for open hot water heaters (in the product overview from page 31, these are marked with a lightning symbol).

Simple, brilliant, without frills:

HANSAVANTIS and HANSAVANTIS STYLE.

Very elegant at the rim of the sink: The slim, linear outer design of the HANSAVANTIS is a direct expression of a sophisticated lifestyle. Its elegant simplicity and the clear, cylindrical shapes make it a classic in modern kitchen culture. Thanks to the two lever variations – solid lever made of brass or the distinctive pin lever – it perfectly emphasises the respective style of the kitchen. Charming and practical: The side operation HANSAVANTIS STYLE.

Thanks to its high and 360 degree swivelling spout, it is perfect for practical tasks like filling high vessels in a stylish and elegant manner.

For variations and explanation of the product characteristics refer to Page 30/31.

Thanks to the easy-care pin lever, operation of the HANSAVANTIS STYLE is convenient, simple and smooth.

The HANSAVANTIS STYLE is a fitting for professionals that looks good in every kitchen. Clever and practical: Since the spray regulator is flush with the pipe of the spout and the spout seamlessly connects to the socket plate, the fitting can be cleaned in an optimum way.

Water.

We need it because it makes things grow, ripen and blossom.

We value it because it refines delicious things.

We love it because it makes pleasure perfect.

The robust fitting for tough, everyday use in the kitchen: HANSAPRADO.

HANSAPRADO really withstands a lot. Its robust surface finish can quickly be cleaned spic and span, even after the wildest cooking action. Its operation is easy and precise, its spout swivels freely and is practical for everyday use.

For variations and explanation of the product characteristics refer to Page 30/31.

Adaptable: The linear design of the HANSAPRADO fits both in a modern as well as a traditional kitchen ambience.

A distinct character is always unique. Like HANSAPINTO.

With its distinctive lever and clear shapes, the HANSAPINTO looks extremely good in a modern and fresh kitchen ambience. It emphasises this impression with the integrated HANSAECO water saving functions as well as the finish that is high-quality to the last detail and the robust chrome plating of the solid metal body.

For variations and explanation of the product characteristics refer to Page 30/31.

Quality in the detail: Solid-metal lever, low-dezincification brass body and a high-quality assembly technique preserve the value of your HANSAPINTO for many years.

You will enjoy its youthful style for many years: HANSAPOLO.

HANSAPOLO is a fitting that will give you years of pleasure. This not only guaranteed by its fresh, clean style, but also by the excellent Hansa quality: from the solid body made of low-dezincification brass (MS 63) and the high-quality lever to the precise control unit. Like all Hansa fittings, HANSAPOLO is plated with high-quality chrome that ensures easy cleaning – an advantage ensuring youthful shine even after years of use.

For variations and explanation of the product characteristics refer to Page 30/31.

Keeps kitchens young: HANSAPOLO is an ideal mixture of exceptional design and proven Hansa technology.

The classic that likes to be in modern kitchens: BONALUX-K.

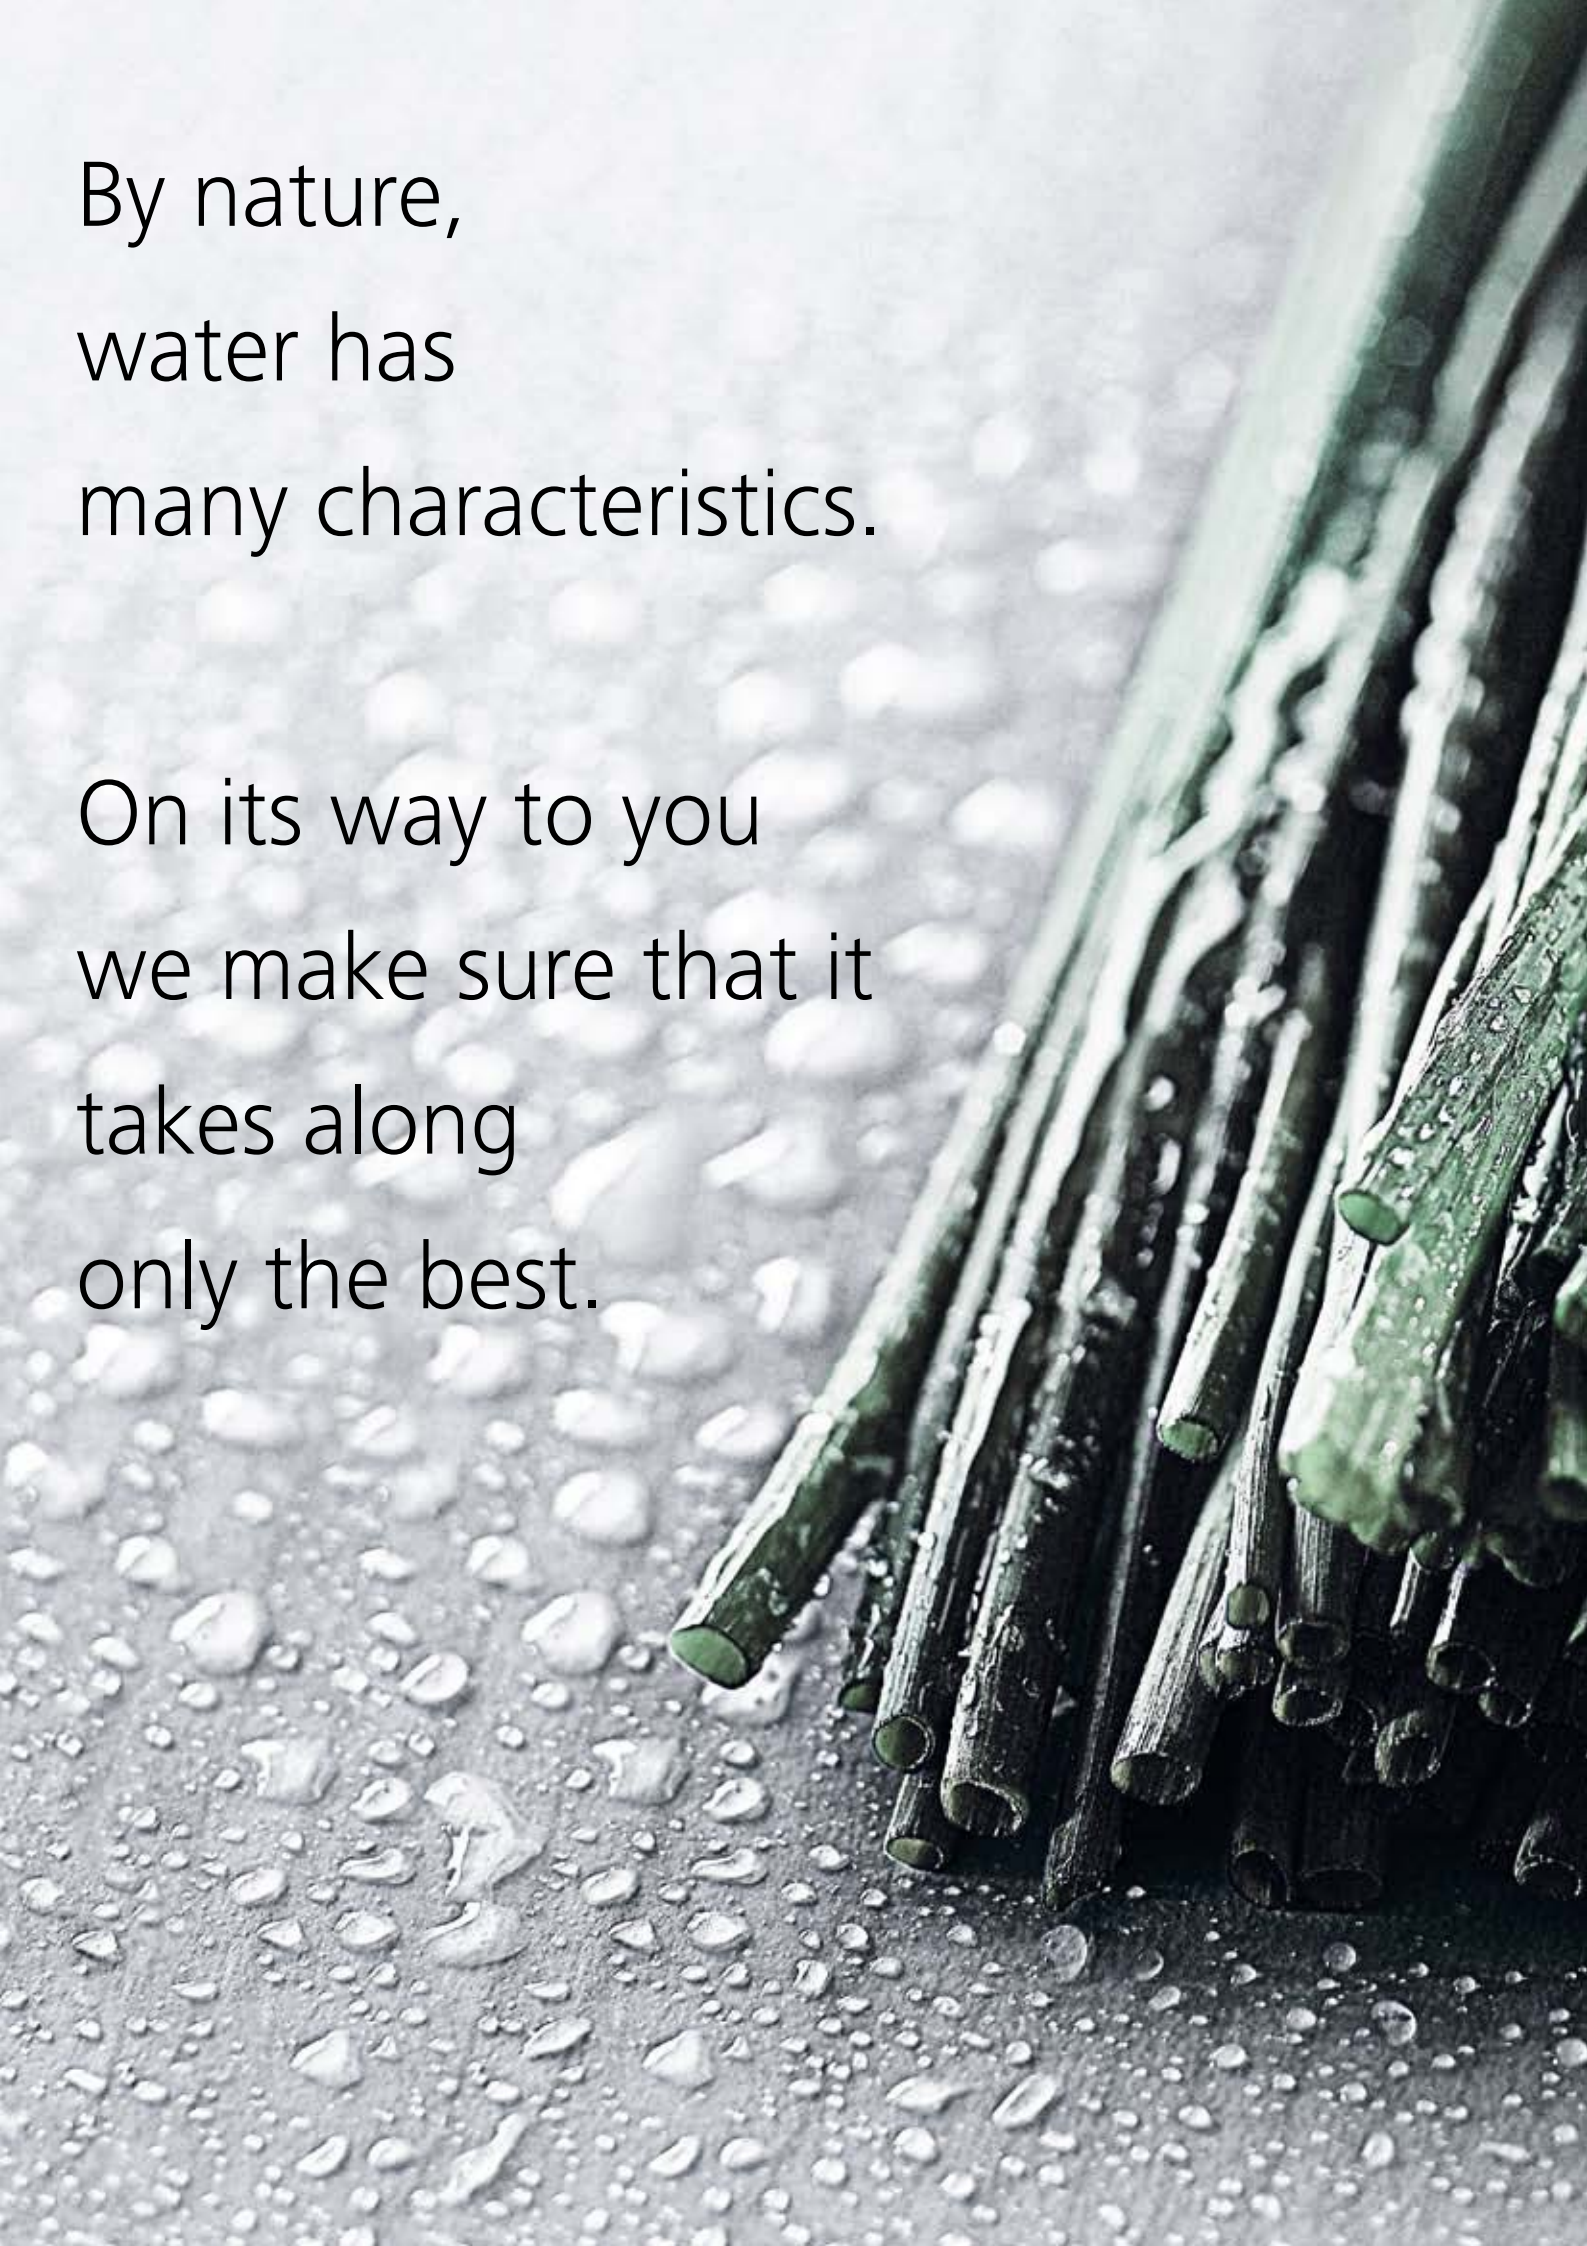

Two levers, and a lot of flair: **BONALUX-K** is a classical beauty with the latest technology. High-quality ceramic discs in the interior of the levers ensure that they can be rotated easily and function reliably.

For variations and explanation of the product characteristics refer to Page 30/31.

Keep a cool head: The BONALUX-K has heat-insulated operating levers to ensure that nobody gets scalded.

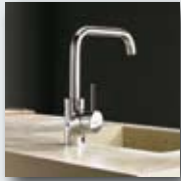

By nature,
water has
many characteristics.

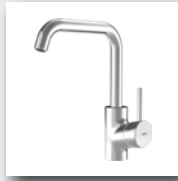

On its way to you
we make sure that it
takes along
only the best.

HANSA has the solution.

HANSA kitchen fittings have a number of technical characteristics and special advantages. To make it easy for you to find the most important arguments for a fitting from HANSA, we have represented these in the form of pictograms for each fitting series. At least one product of this series has the allocated characteristics.

Our partners specialised in sanitary fittings and wholesale know every detail of our products and will be happy to assist you with all your requirements.

Ecology: Option to minimise consumption naturally integrated

Consumes up to 50% less water and energy* thanks to integrated water-saving functions.

Comfort: Unit of function, design, emotion and fascination

Extremely quiet. Fitting complies with the strict requirements of noise class 1.

More flexibility thanks to changeable or detachable spout.

Precise operability thanks to limited swivel radius of the spout.

Flexible usability thanks to free swivel radius of the spout.

More range and functional plus thanks to a single- or multi-spray pull-out hand shower.

Surface finishes are available in various colours and materials.

Health: Materials and functions for maximum hygiene and to preserve the water quality

WATER SAFE. Hi-tech function core. Preserves the water quality.

Safety: Reliable product characteristics for permanently safe operation

Valve for shutting off the water inlet for rinsing or washing machine at the fitting.

Technology: Product characteristics and suitabilities

Low pressure mixer – for appropriately equipped systems

* in comparison to a conventional two-handle mixer.

HANSA – always there for you.
