

**The new experience of lightness:  
HANSAVANTIS.**

 **HANSA**  
experience water

# Unmistakable clear and fresh style. HANSAVANTIS.

This clear, fresh style is unmistakable. Slim and smart – HANSAVANTIS's air of light-heartedness is the perfect choice for modern bathrooms. The dynamically inclined shape of the basin-mixer provides a quite practical advantage: the slope

creates space in front of the wall. HANSAVANTIS' slim figure is full of tried and tested, high quality Hansa technology – for easy operation, care and fully integrated water saving.

## Half is enough:

### Our pressure-independent flow restrictor

Water is our element. Therefore we have a special responsibility towards preserving the quality of this valuable resource which we use every day as a matter of course. A special stream formation unit limits the flow rate from 12 l/min to 6 l/min for all HANSAVANTIS washbasin mixers. Even though the flow rate is reduced by half, the stream remains pleasantly full-bodied.

At least one product in the relevant range features the assigned property.

Optimized water consumption for full comfort by restriction of the low rate to 6 l/min and intelligent forming of the steam.

Extremely quiet.  
Fitting fulfils the strict requirements of noise class 1.

**WATER SAFE.** Hi-tec functional core.  
Preserves the water quality.

#### Washbasin

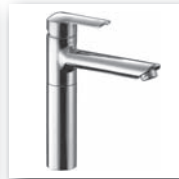

**HANSAVANTIS STYLE one-hole single-lever basin mixer, DN 15**
