HANSANOVA STYLE

**Warmly welcomed where
cold water flows,
HANSANOVA STYLE.**

Doing without warm water doesn't mean having to compromise on aesthetic standards.

HANSANOVA STYLE provides convincing proof of this. With its cool and clear lines and confidently sweeping curves, this cold-water tap is one of the great classics in Hansa's product range, and with consistent improvements is now more up to date than ever.

A new control with a slender lever integrates the function perfectly into the form. A variety of colours and an optional thermostat further extend the already very broad range of applications of the **HANSANOVA STYLE**.

The virtue of restraint. HANSANOVA STYLE.

The great strength of the HANSANOVA STYLE lies in its ideal fusion of form and function, and its barely matchable simplicity. As a wall-mounted or pillar valve, the HANSANOVA STYLE can be installed almost anywhere, harmonising easily with the most varied styles and installations. Four finishes – chrome, white, black and stainless steel – now open up a new range of design options. The stainless steel version is quite perfect for public areas, as it is especially robust and harmonises well with other stainless steel products.

With the thermostat, which can be optionally prefitted to the pillar tap, the HANSANOVA STYLE is now also suitable for use in mixed hot and cold water systems.

Functional and robust without setting a dominant style, the HANSANOVA STYLE continues to be an ideal solution for modern architecture in public areas, as well as for private bathrooms with a deliberately minimalist design.

Sophistication comes from simplicity. For both the wall-mounted and the pillar versions of the new **HANSANOVA STYLE** the controls are fully integrated into the spout. Even the aerator is seamlessly concealed in the spout – another detail to complement the simplicity of the style. The elegance of the formal solution does not contradict the robust nature of this tried-and-tested cold-water tap. Functionality is always the most important aspect.

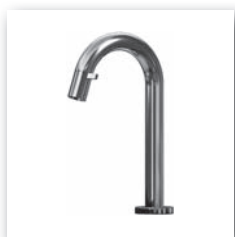

HANSANOVA STYLE product overview

Washbasin

Bain pillar valve

Projection: 94 mm
5093 8101 chrome
5093 8101 82 white
5093 8101 84 black
5093 8101 96 stainless steel

Basin pillar valve

Projection: 131 mm
