When great design becomes an attraction of its own, you know it will make a difference in your life. Besides bringing beauty to life, this new classic is also designed to bring any modern bathroom to the next level.

A hybrid faucet offers more flexibility and freedom of use: the user can choose whether they want to wash their hands with the touchless function without touching the lever - or whether they want to open the faucet traditionally with the lever. The hybrid faucet offers more convenience and flexibility in use and is also a sustainable choice: the touchless function consumes less water and energy.

Slender design and graceful shapes make this faucet the highlight of any space.
